

## Transferring file(s) to Altus PCB using FileZilla manual

If you do not have a FTP client (File Transfer Protocol) you may go to Google/Yahoo/etc and type in FileZilla.

Choose “Client Download”.

Choose relevant client download for your operating system. FileZilla download will start.

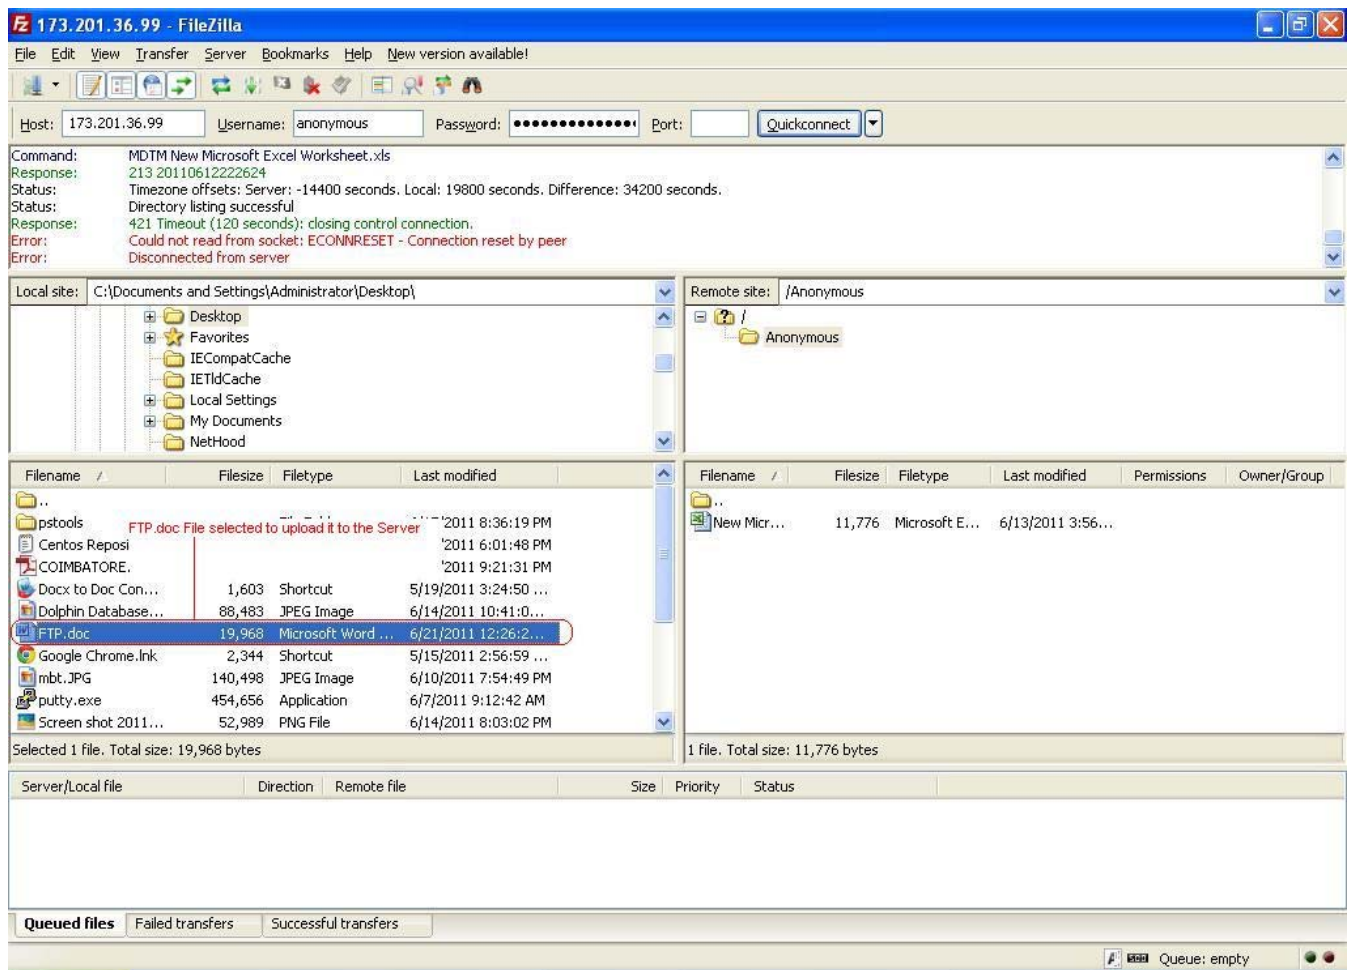

Open FileZilla once installation is complete.

Sign in using the required credentials given on the Altus PCB website.

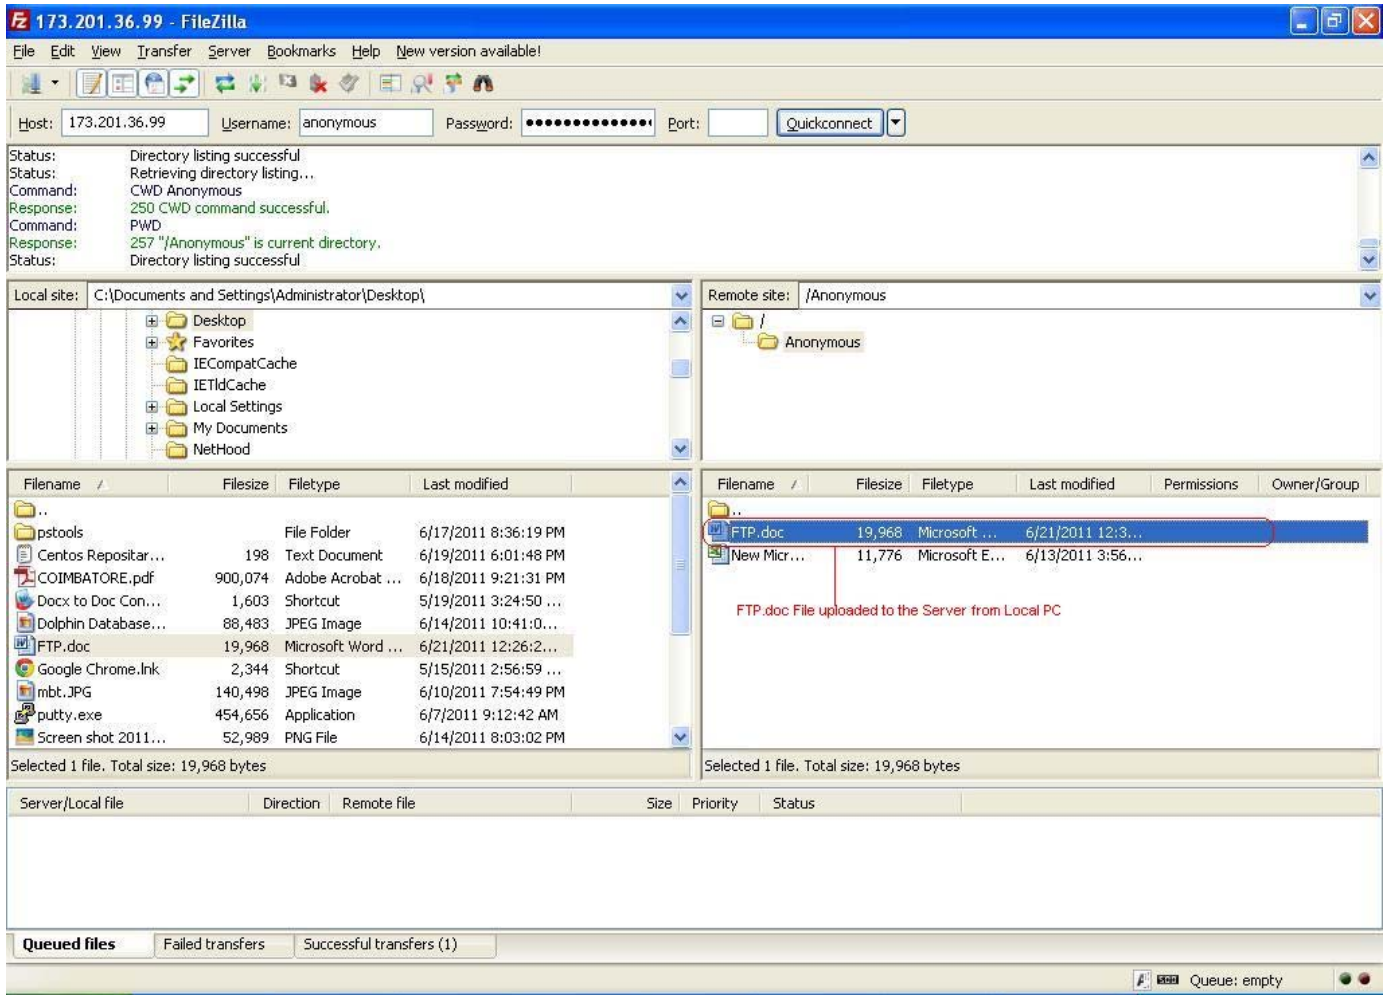

Your local directory and files will be displayed on the left side of the FileZilla screen while Altus PCB will be displayed on the right. \*Screen A

Select the file which you would like Altus PCB to receive (\*Screen A) and drag over to Altus’s screen (\*Screen B). Your file will then be uploaded to Altus PCB for review. \*Screen B
